

# 3D Peg Butterfly

You will need Pilot FriXion Clicker pens, cardstock paper, wooden pegs, scissors and glue.

Print the template on cardstock paper. Decorate the wings using Pilot Pen FriXion Clicker pens. Cut out your wings and small strip. Glue the wings on the top of peg and fold the wings pointing upwards. Glue the strip on one end of the wing going around the peg to stick to the other wing. This will make your butterfly wings flap.
